danniehakan@gmail.com
danniehakansson.com

Solution-oriented developer with a passion for leading by example.
I value highly that my colleagues are thriving psychologically as well as technically, and although I prefer to work with structure and process, I can fit in wherever needed. I am always on the lookout for possible ways to improve.

IKEA – **Ingka Group Digital, Malmö** – *Lead Fullstack Developer (Consultant)*

JUL 2023 – NOW

- Lead a cross-functional team of 6 engineers, driving engineering standards, development practices, and technical decision-making. Also acted as a jack of all trades, jumping between with devops, UI/UX, product initiatives, backend, frontend, data engineering, even technical support and incident management
- Contributed to IKEA.com, a global e-commerce platform serving millions of customers across multiple markets and channels, including native mobile apps and web. Also supported larger analytics pipelines
- Designed and developed distributed microservices and microfrontend solutions to support organisational and technical needs
- Developed and maintained a very frequently visited public web API (1000 req/sec) with 5-10 internal consumers/teams, posing challenges ranging from API design, documentation, caching and client permissions/scope
- Partnered closely with product stakeholders to align technical strategy with business priorities
- Mentored engineers and removed delivery blockers
- *Golang, Typescript, Docker, Terraform, GCP, CI/CD*

Tubestamps, Helsingborg – *Creator, Developer*

SEP 2022 – NOW

- Self-developed and self-hosted a public facing browser extension focused on easing the navigation of YouTube video content
- Designed and implemented everything end to end
- Currently has 700+ active users globally
- https://tubestamps.app/
- *TypeScript, React, Chrome Extension Manifest V3 ecosystem, UI/UX Design*

Changemaker Educations, Stockholm – *Teacher (Consultant)*

OCT 2021 – JAN 2022

- Taught 40 students the foundations of frontend development through online and on-site lectures
- Took students from knowing nothing about web technologies, to the point where they were able to build and deploy websites with rich interactivity. In addition, a large focus was put on the ability to read and understand requirements
- Education level: Yrkeshögskola
- *JavaScript, HTML, CSS, Responsive Web Design, Node, Version Control (Git)*

Klarna, Stockholm – *Frontend Developer (Consultant)*

MAR 2020 – MAJ 2021

- Responsible for setting up two internal documentation websites providing technical documentation within and outside our domain, meant for internal stakeholders/integrators of the tools provided by our teams
- Worked closely with processes related to documentation (editing, reviewing, publishing) with a foundation based on component (React) based markdown
- This work eventually ended up forming a team around customer obsession
- *JavaScript, React, Gatsby, TypeScript, GraphQL, Postgres, Docker, AWS, Node*

DYNAMO Digital Ventures, Stockholm – *Fullstack Developer*

JUN 2015 – SEP 2019

Employed as a consultant, hired by several clients listed below. Contracts were shorter as most assignments involved companies in startup positions in need of acceleration (MVP development). Only larger assignments have been included

NCC (LoopRocks), Stockholm – *Fullstack Developer (Consultant)*

FEB 2017 – DEC 2017

- LoopRocks was the initiative of NCC to change the construction industry to something more climate aware by providing a second hand market for dirt, gravel and rubble. LoopRocks doesn't exist anymore
- Maintained and developed features for the backend system, which included an API consumed by mobile clients as well as an admin application where ads could be managed
- As they expanded to other markets such as Denmark, Finland, Norway and The Netherlands, I was involved in cementing the technical foundation for this. This included, amongst other things, multi-language support and ads belonging to "different markets".
- *JavaScript, jQuery, Material Design Lite, Python, Django, Postgres*

Triple, Stockholm – *Frontend Developer (Consultant)*

OCT 2016 – FEB 2017

- Triple enabled travelers to book activities published by "hosts" that live in the city they are visiting, providing a more personal type of sightseeing. They used to exist on gotriple.com but has since gone out of business due to bigger players such as AirBnb Experiences
- Worked closely with UI/UX to build the entire gotriple.com frontend experience for the MVP launch. This happened during an intense period of 12 weeks.
- *Python, Django, JavaScript, Bootstrap*

ICA, Stockholm – *Frontend Developer (Consultant)*

NOV 2015 – JUL 2016

- As part of an agile team I built "HITTA VARA", a web application where the customers in the store can find their wares on an interactive and searchable map.
- Built a website for ICA-handlare (franchise owners) to draw their map so that they could be populated with wares accurately, involving writing highly interactive JS.
- Built a second tool for store visitors to search for products within the map. This was built for a stationary (Chrome Kiosk mode) computer within the stores themselves

- The HITTA VARA project also expanded to the ICA App, connecting to features such as personal shopping lists (i.e click on item and see it highlighted on the map).
- *JavaScript, AngularJS, .NET*

FitnessCollection, Stockholm – *Frontend Developer (Consultant)*

JUN 2015 – DEC 2015

- FitnessCollection aggregates supply of gyms and yoga studios in one membership.
- As my first consultant gig, I was part of building an admin/back office system meant for FitnessCollection themselves to manage training sessions, users, organizations, studios etc.
- *JavaScript, AngularJS, Bootstrap, Gulp, Google App Engine*

EDUCATION

Yrkeshögskola C3L Systemutvecklare Java, Stockholm – *Exam*

AUG 2013 – MAJ 2015

Vocational education with a syllabus focused on Java backend and databases but also mobile application development, web development, agile methodologies and communication. I was the class representative during the last year.
